

Rain

AI-POWERED MISSION INTELLIGENCE

Rain™ cuts through the noise of modern battlefields. It ingests overwhelming volumes of data, applies AI and advanced analytics, and highlights what really matters. From signals to anomalies, Rain tracks, flags and prioritizes threats so operators can act fast with confidence. The system learns continuously, adapting to new tactics and emerging threats in real time.

Trusted by defense forces worldwide, Rain delivers the intelligence edge when missions depend on clarity.

REAL-TIME DATA TRIAGE

Processes millions of inputs per second and filters noise into mission-ready intelligence.

ADAPTIVE AI MODELS

Continuously retrain with new data, tactics and operator feedback for evolving threat detection.

MULTI-INT FUSION

Integrates SIGINT with other intelligence streams to deliver a unified operational picture.

HUMAN-VALIDATED ALERTS

Pushes forward flagged anomalies with context for rapid operator decision.
