

CARDS

REAL-TIME LIFECYCLE MANAGEMENT FOR COMSEC ASSETS AND OPERATIONS.

CARDS (COMSEC Accounting, Reporting and Distribution System) is a web-based system built to manage the full lifecycle of an organization's COMSEC assets. From key managers at the COR to COMSEC custodians and administrators, it provides a single platform to automate the day-to-day business of COMSEC.

Built on a centralized database, CARDS gives each user access to the information they need in real time while maintaining strict data integrity and audit trails. The platform simplifies everything from accounting and key management to procurement and distribution, helping organizations reduce errors, save time and keep operations compliant.

CARDS is used worldwide to track and manage millions of COMSEC assets across organizations and mission sets.

FULL LIFECYCLE COMSEC MANAGEMENT

Tracks material from receipt and accounting through distribution, inventory and destruction.

REAL-TIME VISIBILITY

Centralized database provides live insight into COMSEC assets, accounts and activity across the organization.

SECURE KEY DISTRIBUTION

Enables fully secure global black key delivery across LAN/WAN, satellite, IP radio and other networks.

AUTOMATED COMPLIANCE AND AUDITING

High-integrity data model with digitally signed audit trails reduces errors and supports accountability.
